

Corrine J Blackthorn

Professional Background

Technologist, creator, and advocate working where technology, security, systems, and people meet.

Professional Focus

Identity and access, governance, lifecycle management, access strategy, information security, risk reduction, infrastructure, automation, cloud platforms, operations, documentation, and practical problem solving.

What I Bring

A people-centered approach to technical systems: making processes clearer, safer, more maintainable, and easier for teams to understand. My work connects technical detail with communication, access, care, and follow-through.

Working Style

- I care about the human experience of technical systems.
- I like making messy processes clearer, safer, and easier to maintain.
- I bring curiosity, patience, direct communication, and care to cross-functional work.
- I value access, inclusion, documentation, and systems that help people succeed.
