CORRINE J. BLACKTHORN

Senior IAM Governance & GRC Professional

Identity Governance | RBAC | Security Governance | Audit Readiness | Policy & Control Design

Portland Metro, OR | c.wilson.technerd@gmail.com | 503-302-6438

PROFESSIONAL SUMMARY

Senior IAM governance and GRC-focused security professional with 20+ years of IT experience, including nearly seven years on Nike's Identity and Access Management Engineering team and current senior security work supporting Portland Public Schools. Experienced leading cross-functional governance initiatives, RBAC and access-control modernization, audit readiness, control evaluation, remediation, policy and procedure development, process improvement, security architecture documentation, and automation. Proven ability to translate operational, business, and compliance requirements into scalable controls, measurable processes, and audit-ready governance artifacts while coordinating technical teams, business stakeholders, auditors, and leadership.

GOVERNANCE & LEADERSHIP STRENGTHS

IAM Governance | RBAC & Least Privilege | Identity Lifecycle Governance | Access Reviews & Certifications | Entitlement Governance | GRC | Security Governance | Audit Readiness | Security Control Design & Evaluation | Risk, Issue & Remediation Management | Policy & Standards Development | Process Governance | Security Architecture & Systems Mapping | Program / Project Leadership | Stakeholder Facilitation | Metrics & Reporting | Automation & Continuous Improvement

FRAMEWORKS, PLATFORMS & TECHNOLOGIES

SailPoint IdentityIQ | Active Directory | Microsoft Entra ID | ServiceNow | PowerShell | SQL | SCIM 2.0 | OpenWRT | Arch Linux | pfSense | NIST | ISO 27001 | SOX | SOC 1 | SOC 2 | PCI-DSS | GDPR | GLBA | FERPA | COPPA | OSIPA | SIPA (familiarity) | Splunk Exposure | CrowdStrike Exposure

PROFESSIONAL EXPERIENCE

PORTLAND PUBLIC SCHOOLS (via AP Professionals) | Senior IT Security Administrator - Identity & Access Management / RBAC

Aug 2026 - Present

- Operate as a senior security and IAM governance SME across concurrent modernization initiatives, translating business, technical, and risk requirements into scalable access-control, governance, documentation, and remediation work.
- Drive RBAC and access-governance work across enterprise applications and technology environments, including role and entitlement analysis, least-privilege alignment, access dependencies, control design, and governance documentation.
- Assess, document, and refine IAM and security processes to improve control consistency, operational clarity, ownership, auditability, and long-term maintainability; identify gaps and practical opportunities for standardization.
- Identify and develop automation opportunities across security and IAM workflows to reduce repetitive effort, improve process consistency, strengthen evidence quality, and support more reliable control execution.
- Design and build a homebrew firewall proof of concept using OpenWRT, Arch Linux, and pfSense to evaluate security controls, network segmentation, architecture tradeoffs, and operational feasibility.
- Develop the foundation for an information security policy handbook, incorporating education-sector privacy and security considerations, including familiarity with FERPA, COPPA, OSIPA, and SIPA, alongside policy ownership, control standards, and audit readiness.
- Create technical procedures, security mappings, governance artifacts, and process documentation while partnering with security leadership, infrastructure teams, application owners, and business stakeholders on IAM, GRC, and security-governance priorities.

NIKE, INC. | IAM Security Engineer

Nov 2017 - Sep 2024

- Supported enterprise IAM governance and operations across a 70,000-80,000 user global environment, partnering with application owners, auditors, developers, HR, InfoSec, and business stakeholders.
- Served as primary IAM audit liaison across recurring SOX, SOC 1, SOC 2, ISO 27001, NIST, internal, and external audit activities; led walkthroughs, evidence coordination, control validation, issue tracking, remediation follow-up, and audit-ready documentation.
- Led a 10-12 month external Active Directory governance remediation initiative, coordinating contractors and stakeholders while helping centralize governance and reconcile more than 10,000 stale, obsolete, or unnecessary identities.
- Designed and implemented SailPoint IdentityIQ, SQL, PowerShell, and Excel-based governance reporting supporting audit readiness, operational metrics, access-governance reviews, licensing analysis, and RBAC remediation.

NIKE, INC. | IAM Security Engineer (continued)

- Configured and executed enterprise access-certification campaigns, including reviewer population design, certification setup, communications, governance reporting, escalation management, and validation of access decisions.
- Personally onboarded approximately 15-20 enterprise applications and supported additional governance initiatives involving ownership, entitlement structures, access models, provisioning workflows, controls, and connector requirements.
- Served as technical lead for a six-month Azure governance initiative involving storage-account access reviews, ownership reconciliation, Key Vault certificate lifecycle cleanup, and security-policy improvements.
- Reviewed role models, entitlement mappings, and birthright access structures to support RBAC governance, least-privilege objectives, and compliance requirements; authored procedures, governance documentation, and mentoring materials.

TECHNERD CONSULTING | Independent Technology Consultant

Jan 2001 - Present

- Provide technology consulting, security guidance, requirements discovery, process assessment, documentation, business continuity support, troubleshooting, and technical writing for individuals and small organizations.
- Translate complex technology, security, and governance concepts into clear procedures, instructional materials, user guidance, and practical recommendations for varied audiences.

UMPQUA BANK | Network Security Administrator

Jul 2017 - Nov 2017

- Supported secure access administration, approval workflows, access-control procedures, compliance expectations, and PowerShell-based process improvements in a regulated banking environment.
- Reviewed access procedures for control alignment, enforced documented approvals, and identified process gaps, automation opportunities, and remediation needs.

BLOUNT INTERNATIONAL | Technical Analyst II / Security-Focused Escalation Resource

Dec 2013 - Jul 2017

- Supported incident response, malware investigations, ransomware recovery, access administration, compliance readiness, endpoint recovery, security-awareness initiatives, and security-focused technical documentation.
- Managed Active Directory accounts, security groups, Exchange permissions, SAP access, and automation activities using PowerShell and scripting technologies; led early GDPR security-readiness and control-gap analysis work.

EDUCATION & PROFESSIONAL DEVELOPMENT

Mt. Hood Community College - Information Technology, Networking, and Cybersecurity Coursework
Professional Development: CISA, CISM, CISSP, and CEH training coursework; SailPoint IdentityIQ, ITIL, AWS fundamentals, IAM governance, compliance, and cybersecurity operations. Former CompTIA Security+ and Network+ holder.
